

# PROTECTING PREGNANT PATIENTS AND THEIR BABIES, ONE VACCINE AT A TIME.

Together, we can ensure a healthier future for every family.

## VACCINES RECOMMENDED FOR PREGNANT MOTHERS

Our pharmacy offers the following vaccines recommended by the CDC and ACOG for pregnant mothers:

### RSV (RESPIRATORY SYNCYTIAL VIRUS) - ABRYSVO®:

- Prevention of RSV lower tract disease & severe lower respiratory tract disease in infants from birth to 6 months.
- Recommended during pregnancy between 32 - 36 weeks.
- Recommended during RSV season (Sept.-Jan.)

### INFLUENZA (FLU) VACCINE:

- Reduces the risk of severe flu illness in the mother and complications in the baby.
- Recommended during any trimester of pregnancy.

### TDAP VACCINE (TETANUS, DIPHTHERIA, AND PERTUSSIS):

- Protects against whooping cough, which can be life-threatening for newborns.
- Recommended during each pregnancy, between 27-36 weeks of gestation.

### COVID-19 VACCINE:

- Prevention of COVID-19.
- Recommended during any trimester of pregnancy.
